Dear Execom hiring team,

I am writing to apply for the post of Chief Finance Officer (CFO).Let me honestly say that, being part of the IEDC Team is more important to me than the post.I have been connected to the IEDC team during my 3 years of study in the college.I got an oppurtunity to be a part of Ignite 2.0,bootcamp held last year.I am very fond the way this network is working.One thing I was upset-was that being from a branch like Chemical,with no or less programming knowledge,I was not able to use the IEDC platform to build ideas.However I was in touch with people who were active in the club.

I have attendened the programme 'Njan Samrambhakan' as a vounteer for The Gulmohar Foundation,an entrepreneurial informative event hosted by the media startup Channel I'm.Channel I'm is hosting Startup Studios in colleges across state ,I think if tkm have one would be better.These lockdown days,attending various webinars or live streamings of technological communities like TinkerHub made me realize the importance of exploring technology out of the conventional education system.

Although,I volunteered with different organizations like NSS,UNAI,TGF,UYC..etc ,what I miss during my college days is being part of a community to discuss,develop technology.Therefore,I hope being part of this community will help me to develop a network among people to learn,discuss and develop technology.As a well-wisher of this organization,it would help our students if IEDC setup of informal peer learning groups to learn technology.

This is why I wish to be part of IEDC team. Speaking about the post in particular, I have handled certain finance related responsibilities while volunteering for clubs like UNAI, hope that would help. Thank you for taking my application to consideration.

Sincerely

Sahal Shaji
