IEDC
TKM college of engineering
Kollam

Dear IEDC: I am Hari Prasad EG , 6th semester student of electronics and communication department. I am not an active member on iedc or I can say that am atleast a new member to iedc family. Initially am not well aware of what is iedc and what they are doing perhaps I didn't look into. In my second year we have to deal with core subjects and want to take part in technical events so I am there at iedc there provided as with what all requirements what we need for the completion of our product.

Then onwards I am there at iedc for technical help because lots of my friends were there. I started to look into those things that they were doing and found it interesting. Even though I am an electronics undergraduate I found management more interesting and I am very well confident that I could manage what all situation confront me. I am the Ec dept expo design head for Hestia'20 and also a mentor for second year student for guiding their project. I'm there in the volunteering family .I volunteered many events and programs in our college. I'm also a coordinator for paper presentation contest happened in our college as a part of evoke'19. I'm also there in astronomy club and done a project under the club as a part of hestia'19. I'm participated in tatva'20 for technical event that is for building an robotics arm. I'm an active member in IETE.

Sincerely,

HariPrasad eg
