Dear Sir/Madam,

I am willing to express my genuine interest in channelling and encouraging creative activities under KSUM by maintaining a prominent role in the Executive Committee of IEDC. This is my sixth year of pursuing my love for electronics and innovation by being a DIY hobbyist.

Since pursuing my BTech course in EEE at TKMCE, I had the pleasure of performing a few important roles such as Innovation Head in Jager 2.0 and Baja, Second Year Delegate in IEI and Electrical Head in ESVC. I am also a guy who likes to take on tasks and to create a signature or to establish a landmark in the same manner as can be seen in many of the works I have accomplished.

Some of my achievements worth mentioning:

- Was a part in developing a ventilator, a project initiated by TKMCE with IEDC and FabLab
- I have got certified FAB Lab training and possess a strong fab culture of supporting and motivating others.
- managed to lead volunteers in manufacturing submersible lights during flood time in Kerala under IEDC.
- was a certified volunteer in re-establishing and ensuring electrical safety in flood-affected areas under IEI.
- I have managed to bag few prizes on circuit designing, debugging, simulating from NIT, TKM etc.

Being an involved member of IEDC since my first year has not only shown me how an executive committee will function but has also provided me with the ability to embrace other thoughts and put them together to meet the goals that the world appreciates. I look forward to this privilege of becoming a representative of TKMCE as an execom member of IEDC.

Sincerely,
M S Ali
