S ARJUN VIGNESH

Dept. of Electrical and Electronics

TKMCE

To,

IEDC

TKMCE

Sir,

I believe that being a part of IEDC executive committee is a very big opportunity that every student of this institution is dreaming of. Here I would like to submit an application for the position of CEO of this committee. I believe I'm a person with strong desire, hardworking mentality, ethics, communicating behavior and good leadership quality.

My work experiences includes being Co-founder of UMo cycles which is a startup company manufacturing and marketing electric cycles and this project got 2nd prize at Enlight 2020 entrepreneurship conclave. I trained as an intern in KSEB 110kV substation, Areacode, Electrical and allied engineering co Ltd, Alternator unit Kundara. Also had experience of being an active participant of Mission reconnect programme to reconnect electrical services disrupted as a result of devastating floods in 2018.

I had done project on composite non-linear feedback control based engine gimbal controller and a research paper review accepted for publication on INTERNATIONAL JOURNAL OF INFORMATION TECHNOLOGY AND ELECTRICAL ENGINEERING (ITEE).

I am passionate about developmental programmes and i welcome every opportunity that could take capabilities to a higher level. If I get this opportunity I believe I could bring out the exceptional skills among the students of this institution through well planned and coordinated practices and we could present our innovations to the highest level so that it can be added up into the developmental programmes of our country.

With the experience of being the coordinator of All India educational tour of our department I believe I m a good leader as well as a good organizer, so that i could manage all the activities that are going to be assigned to this committee. I hope you will give me an opportunity to meet with you in person and discuss further contributions that I can make to achieve our goals

Faithfully

S Arjun Vignesh
